## Overview

Annual consumer price inflation as measured by the Consumer Price Index (CPI) was 4.5 per cent in August 2025. This implies that the general price level was 4.5 per cent higher in August 2025 than it was in August 2024. The price increase was primarily driven by a rise in prices of items in the Food and Non-Alcoholic Beverages (8.3%); Transport (4.4%), and Housing, Water, Electricity, Gas and other fuels (0.8%) over the one-year period. These three divisions together account for over 57 per cent of the total weight across the 13 major expenditure categories.

Consumer Price Index (CPI) is defined as a measure of the weighted aggregate change over time in retail prices paid by consumers for a given basket of goods and services. The CPI measures the cost of purchasing this fixed basket of goods and services, comparing current prices to those of a base period, which for the current CPI is February 2019. Inflation rate is defined as a percentage change of the CPI between two periods. There are different inflation rates that can be computed, such as annual (year-on-year), quarterly (quarter-to-quarter) and monthly (month-on-month) inflation rates. Data used to derive the inflation rates is collected through a monthly survey of retail prices from a statistically representative sample of outlets in urban areas across 50 data collection zones nationwide. The survey is conducted during the second and third weeks of the month.

## The Overall CPI and Inflation Trends, August 2024-August 2025

As presented in Figures 1 and 2, the overall index increased from 145.74 in July 2025 to 146.21 in August 2025, resulting in a monthly inflation rate of 0.3 per cent.

Figure 5: Percentage Change Over Last Month, July 2025 - August 2025

## Core and Non-Core Index and Inflation

Core inflation is a measure of inflation that is compiled from non-volatile commodities such as manufactured food items, health services, education services, and ICT. Core inflation was 3.0 per cent in August 2025, as presented in Table 4. The core index decreased from 129.59 in July 2025 to 129.57 in August 2025. Non-core inflation was 9.2 per cent during the same period.

**Table 4: Core and Non-Core Index and Inflation**

| <b>Period</b> | <b>Core Index</b> | <b>Core Inflation</b> | <b>Non-Core Index</b> | <b>Non-Core Inflation</b> |
|---------------|-------------------|-----------------------|-----------------------|---------------------------|

### **Contribution of Core and Non-Core to the Overall Inflation**

Contribution of core and non-core inflation to the overall inflation is presented in Table 5. Core inflation contributed 2.8 points, while non-core inflation contributed 1.7 points to the overall inflation in August 2025. Food and non-alcoholic beverages contributed to 2.7 points to the overall inflation.

**Table 5: Core and Non-Core Contributions, August 2025**

| <b>Broad Categories</b>                                  | <b>Core</b> | <b>Non-Core</b> | <b>Total</b> |
